DAWID LANGE

SOFTWARE DEVELOPER

ABOUT ME

With over a decade of experience in software development, I remain deeply passionate about the tech industry and its continuous evolution. My architectural approach balances respect for proven, time-tested systems with a drive to adopt cutting-edge innovations. I heavily leverage AI to maximize efficiency, incorporating GitHub Copilot in my daily IDE workflow and architecting applications with modern LLM API integrations. Looking ahead, I am striving to transition into a hands-on Tech Lead or Team Leader role—a position where I can drive technical vision and mentor a team while remaining actively involved in coding and development.

EXPERIENCE

PGS Software / Xebia

2017 – 2026

Software Developer

IMPRVER (2022-2026)

Developing HR management software for Scandinavian clients: delivered new functionalities—for example optimizing notification (Reduced delivery time for new notifications by 50%), deployment time by 60%—resolved 40% of critical system bugs, and provided technical support to internal teams. Integration with external suppliers, including government ones (NAV).

EVOLUTION (2019-2022)

Developing HR management software for Scandinavian clients: creating new functionalities, resolving bugs, client communication, and providing technical support to other teams

MEMBR (2017-2019)

Gym Management Software: integration software with gym located in many countries on the world, adding new feature, fixing bugs, support clients

LPP

2017 – 2026

Magento Backend Developer

Development of Magento EE-based e-commerce stores for Reserved, Mohito, Cropp, House, and Sinsay. Provided production support and issue resolution (HelpDesk) for stores in Poland and international markets, including Germany, the Czech Republic, Hungary, Slovakia, and Romania. Participated in developing a microservice for transaction fiscalization in the Czech market. Involved in launch preparations for e-commerce platforms in the Baltic states (Lithuania, Latvia, and Estonia).

Droptica

2015
