PROFILE

I have been involved with the IT world and software development for over a decade, but I am constantly fascinated by the surprises this field holds. I strive to keep up with the latest innovations but also hold a deep respect for proven, time-tested solutions, in line with the saying "if it works, don't fix it" and the belief that one should not try to change the world forcefully. I cannot imagine my future without programming, and I would also like to test myself in a leadership role, such as a team leader or tech leader, to which I will be striving

WORK EXPERIENCE

PGS Software / Xebia
